

# JOB APPLICATION TRACKER

Presented by

**23CDR009-ANUSHRI T**  
**23CDR029-DEEPADHARSHINI K**

# PROBLEM STATEMENT

Helps job seekers manage their applications, track their status, and record interview details.(RDBMS: Applications, Companies, Status Updates,Interviews;Backend:Applicati on entry, status updates, interview scheduling (basic)).

# Project Overview

■ The Job Application Tracker is a web-based system that allows users to:

- Log job applications and company details
- Track the status of each application
- Record and view interview schedules
- Update and manage application progress
- Generate a summary of recent activities

# MODULES

- User Authentication Module
- Application Management Module
- Interview Scheduler Module Status
- Tracking & Dashboard Module

# User Authentication Module ○

- Secure login/signup
- Session-based access control
- Password encryption using hashing

# Application Management

## Module

- Add/edit/delete job applications
- Link company and job information
- Assign statuses (e.g., Applied, Interviewed, Hired)

# Interview Scheduler Module

- Add interview details (date, time, location)
- View upcoming interviews
- Update or reschedule interviews

# Status Tracking & Dashboard

## Module

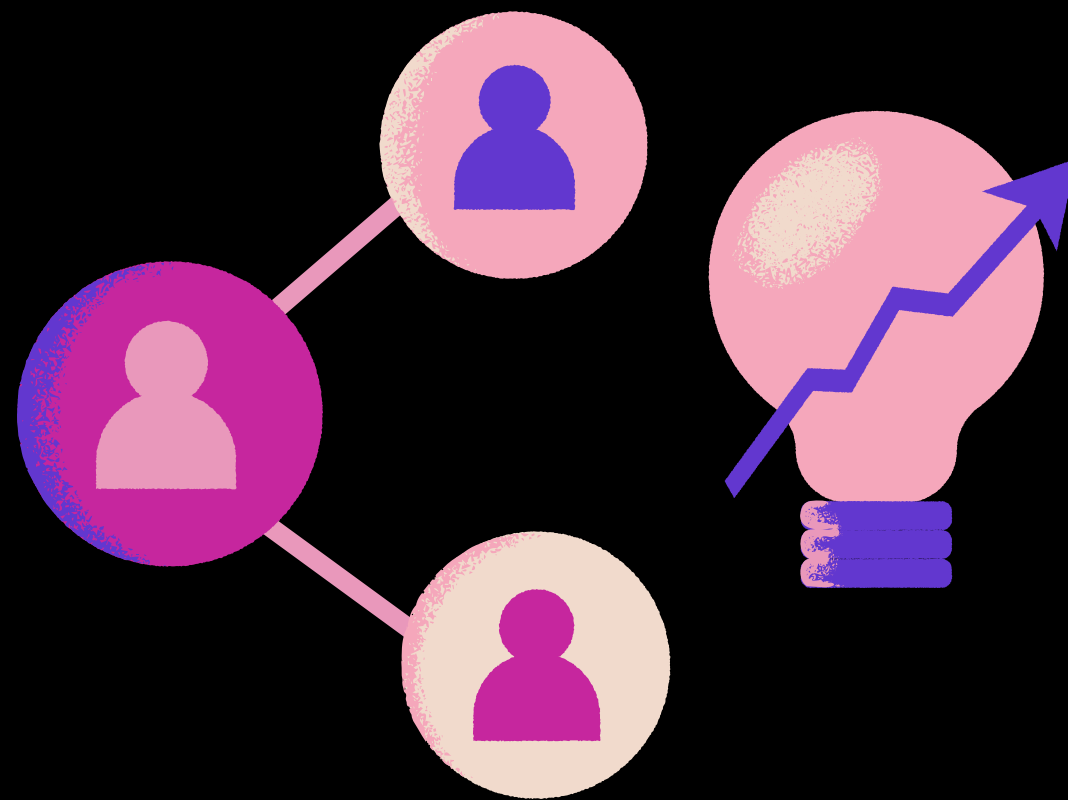

- View all applications in a table
- Search/filter by company name or status
- Visual summary of recent activity

# KEY FEATURES

- Centralized job application history
- Interview scheduling with auto-linking
- Interactive dashboard with recent entries
- Secure user authentication
- Clean, responsive UI

# TECH STACK

**Frontend:** HTML, CSS

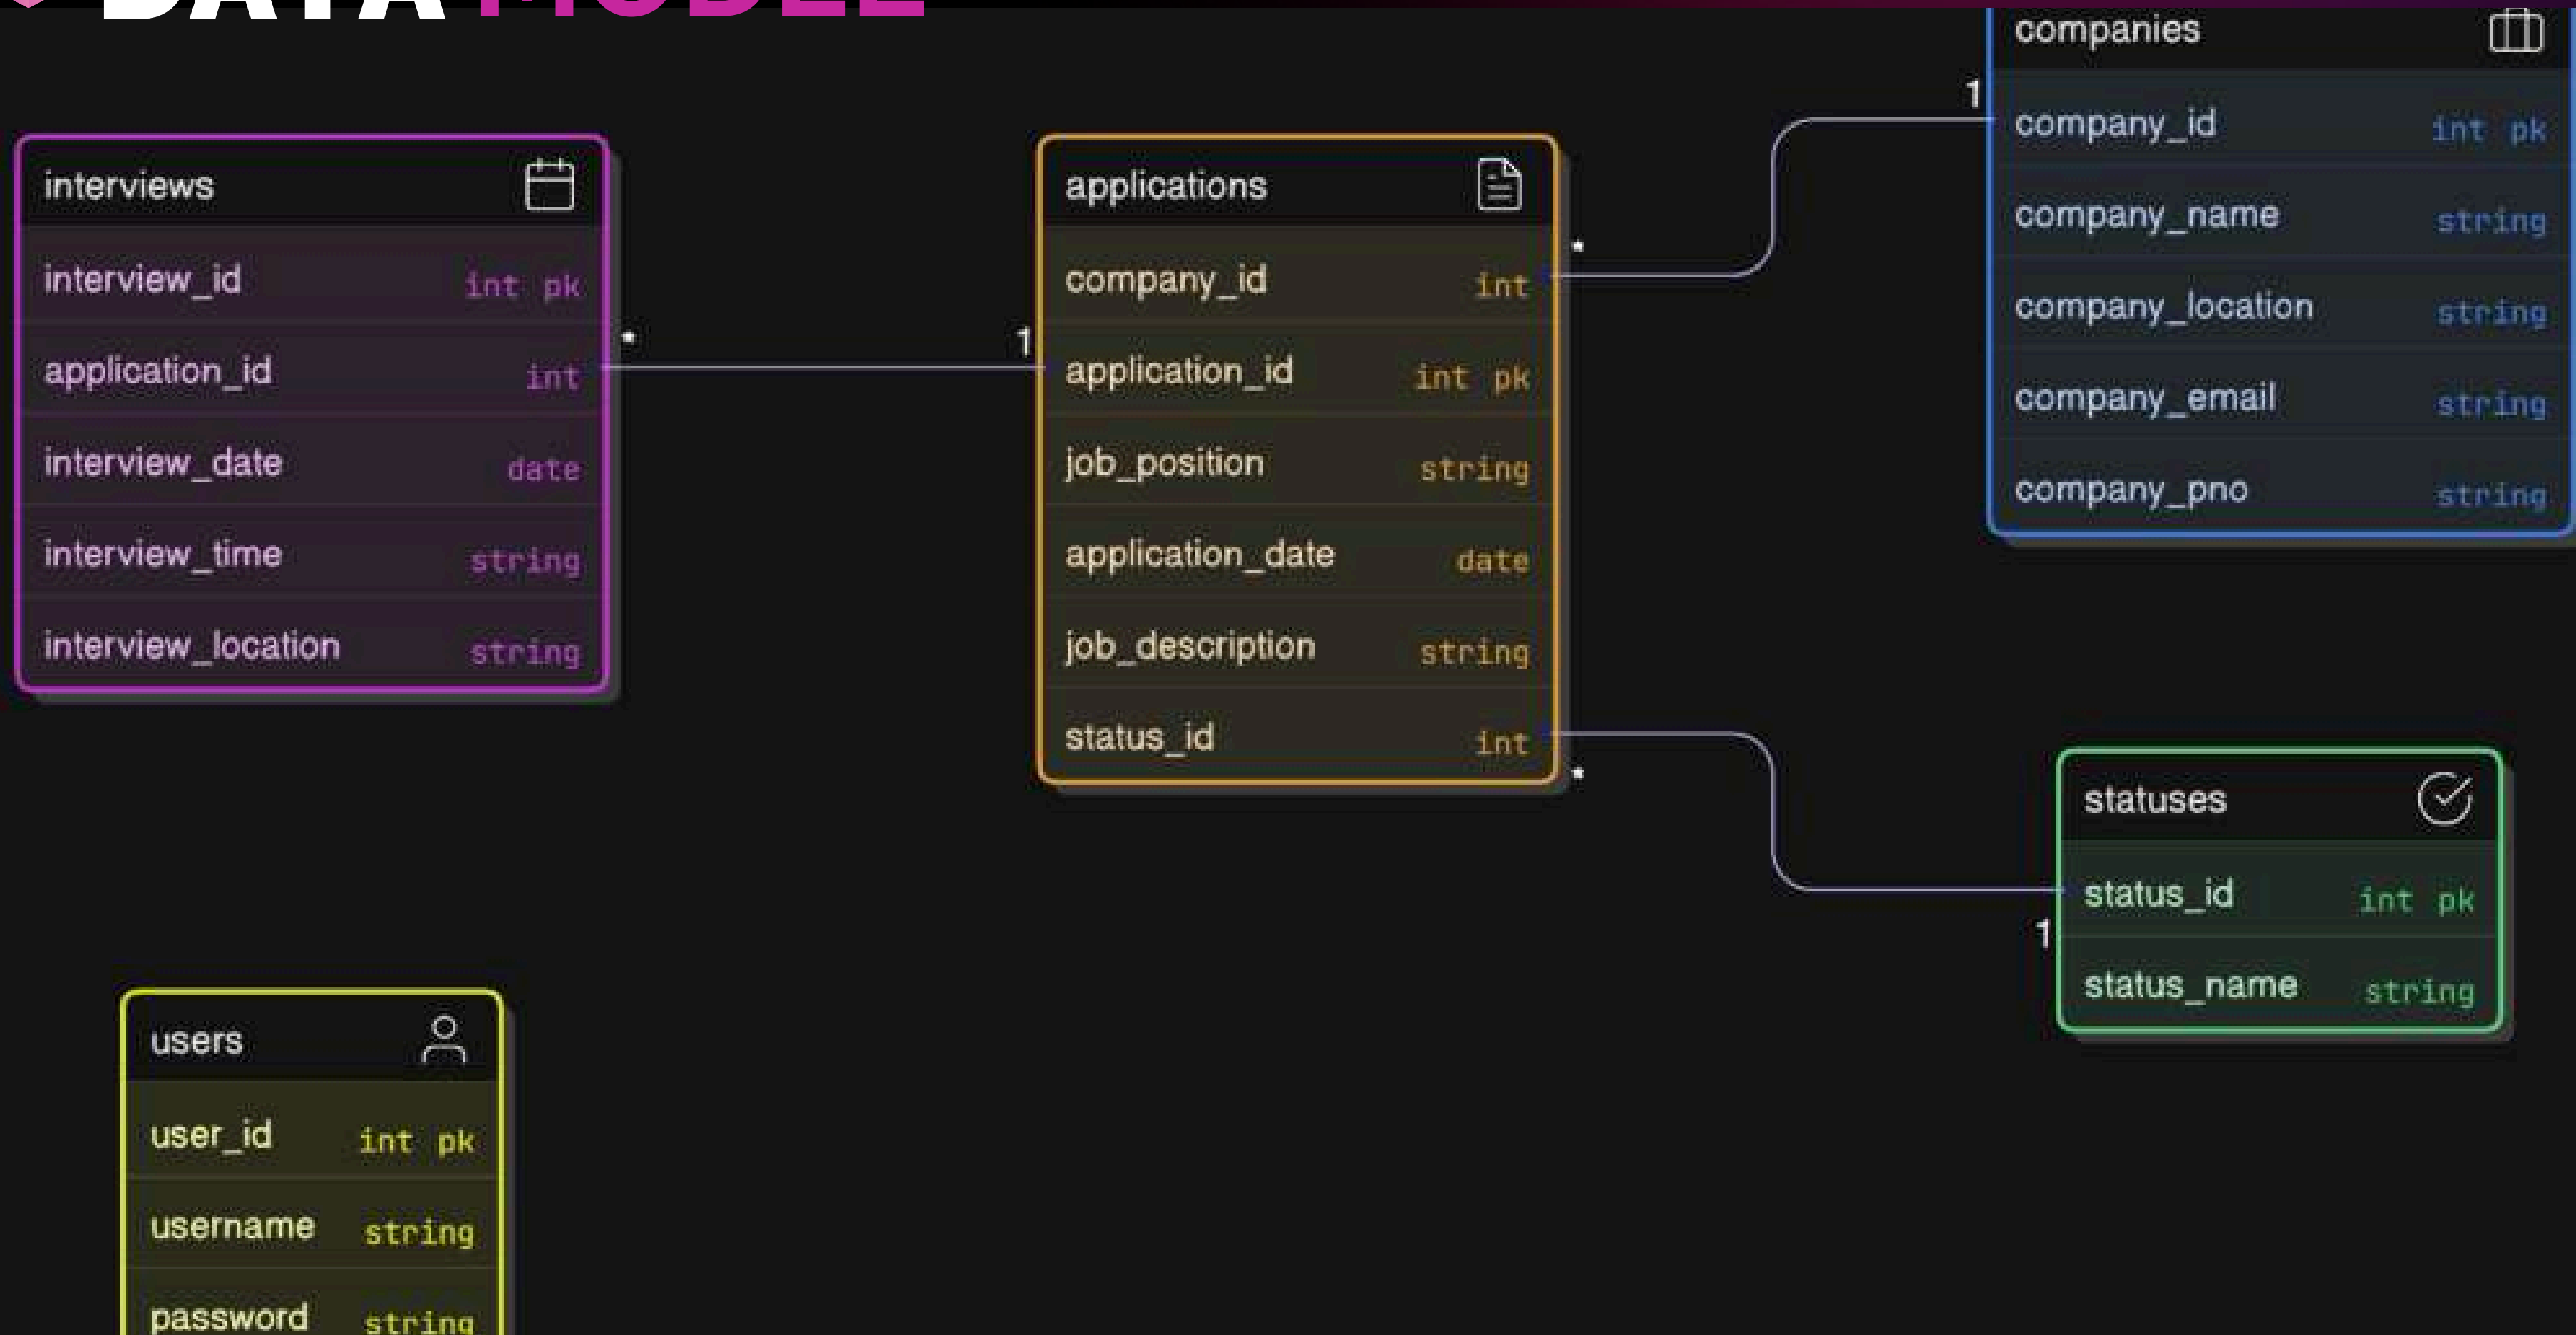

**Backend:** Python (Flask)

**Database:** MySQL

**Deployment:** XAMPP / Localhost

**Reporting:** Basic JSON API used for  
dashboard display

# DATA MODEL

**Thank You!**
